PLEASE NOTE:

Tapered bottles **MUST** be printed on separate webs (FB2) to ensure proper placement of back label.

Please supply samples prior to bottling dates when using clear labels and/or clear liners.

This allows us to assess the type of sensors that will need to be used.

Neck and/or shoulder labels require approval prior to scheduled bottling run.

Bottle orientation may be possible. It requires review and approval prior to scheduled bottling run.

Pricing will be quoted at that time.

Clients using face labels on box exteriors should ask printer to roll separate labels for that purpose, if possible.
